*Last Updated 08/14/2020. Will be updated monthly.*
*Symptom onset data is collected from interviews. Therefore, if someone was not reached for an interview, their information would not be included in the data above. Additionally, it can take up to 14 days for symptoms to begin and therefore the data may lag by several weeks.*
The graph above illustrates the number of novel coronavirus-related visits by all provider types across the state of Ohio. This is a newly created surveillance activity and therefore not all facilities may be using this classifier at this time.

The graph above illustrates number of recorded visits to hospitals and urgent cares for ‘COVID-19-like’ symptoms in Delaware County, Ohio. Some of the recorded visits from the beginning of the year could have been due to influenza season.
