COVID-19 CRITICAL FACTOR REPORT CARD

OCTOBER 13, 2021

On July 27, 2021, the CDC recommended **5 critical factors** be considered to inform local decision-making and community guidance.

Based upon this recommendation, DPHD will look at these factors on a weekly basis and report a pass or fail status for each available factor.

When 2 or more of the available factors are reported as failing, a recommendation will be made that everyone (including fully vaccinated individuals) wear a mask in public indoor settings.

In addition, everyone should comply with the practices of facilities and businesses that continue to require masks. Fully vaccinated individuals should make the decision to wear a mask based on their own risk assessment or that of their family and friends.

1

Level of SARS-CoV-2 community transmission
(New cases per 100,000 persons in the past 7 days)

Positivity Rate

Data source:
covid.cdc.gov/covid-data-tracker/#county-view

262.46/>50	FAIL
7.13%/8%	PASS

2

Health system capacity according to OHA Region 4 data
(Percent of ICU patients with COVID-19)

Data source:
ohiohospitals.org/covid19data

20%/>20%	PASS

Health system capacity according to ODH Region 4 data
(COVID-19 ICU beds in use)

17.04/>20%

Health system capacity according to ODH Region 4 data
(Total ICU beds in use)

85.08/>80%
